

JCT 600 Bradford League Scorers Newsletter no 10.

This week's newsletter is again short and sweet! We thank you all for your continued co-operation.

In recent weeks we have been trialing the new dongle from 3. It was initially used at Gomersal where the signal has been poor on 02 and it passed the test with flying colours with not one break in signal all afternoon. It was then tested at Keighley last Saturday with the same result.

There are a number of options for purchasers but the one we would recommend costs £39.99 and includes three months credit or 3GB of use – whichever comes first.

If anybody is having connection problems with the dongle they are using, please contact David Young as the league does have a couple of spare dongles of different types which we are happy to use to help scorers overcome problems.

Additional registrations for this week are:

Damon Gormley (Yeadon)*

Sakander Raja (Manningham Mills)

Elliott Milnes (Woodlands)

Hasnain Asif (Saltaire)

Saif Khan (Saltaire)

Gareth Teasdale (Idle)

Asad Ali (Idle)

*Damon Gormley has been eligible since June 5 but we overlooked including him on the list when his registration was approved.

Although this newsletter has focused almost exclusively on laptop scoring, Idle wish top draw your attention to a scoring issue which is causing concern.

The quality of the results sheets for Dyson Insulations Twenty/20 Cup match is poor. Key information is being left out and it appears that little care is being taken.

Please can you give this matter particular attention. For Twenty/20 games the result must be texted immediately afterwards and the results sheet has to be submitted by midnight on the day following a match.
